

Important Dates Timeline (diagnosis date, biopsy, treatment start, milestones)

[illegible]

This is your place to record the key moments along your journey - from the day you received your diagnosis to treatment milestones, scan results, surgery dates, and small but significant wins. Having everything in one spot makes it easier to reflect on how far you've come, track patterns, and prepare for what's ahead. This timeline can help you feel more in control, informed, and proud of your strength along the way.
